Product Description

CIAP716(N)-4A25 is an outdoor Wi-Fi 6 dual-band AP. It can be optionally equipped with 5G NR module. The product is based on the powerful Qualcomm wireless core. With a transmission power of 27dBm and external antennas, it can achieve a larger coverage range. It supports IEEE 802.11a/b/g/n/ac/ax protocol, and the maximum WiFi access rate reaches 3000Mbps.

CIAP716N-4A25 is equipped with a 5G Sub-6GHz M.2 module designed for IoT/eMBB applications. It adopts 3GPP Release 16 technology, and can automatically adapt to 5G NR NSA and SA networking, and is downward compatible with 4G/3G. It can achieve backup of wired broadband and cellular broadband networks, and can provide network access for WiFi users through 5G broadband in scenarios where wired broadband access is lacking.

The excellent performance and stability not only come from the high-end Qualcomm core platform but also rely on our professional R&D team's hardware and software design. The product can be widely used in industries and scenarios such as park coverage, energy mines, smart harbour, warehousing and logistics,smart cities, exhibition halls, and venues.
